

Corporate Profile

The Company

Process Wastewater, the accomplished innovator of municipal and industrial wastewater technology, specialises in primary and secondary treatment.

We recognise the bespoke nature of each client's treatment requirements and apply intricate technical expertise to successfully deliver inspired engineering solutions.

With historical Australian and New Zealand business routes and support from market leading local and international technology providers, Process Wastewater's emphasis on performance, efficiency, quality, and longevity, ensures projects are furnished to the highest specification.

Present

Provider of innovative, high performing, quality, and enduring wastewater solutions to protect our future.

Future

Extend regional influence, transforming expectations in wastewater processing technology to embrace long term energy, environmental and commercial savings.

Values

Cultivate Constructive Relationships

We provide an engaging and transparent environment that encourages investigation, creativity and the sharing of ideas to enhance technical acumen, improve design, and encourage long standing relationships.

Thrive with Integrity

We support our products, services and people responsibly and with integrity to protect our end user's critical assets.

Strive Beyond the Highest Standards

Innovation and quality are essential to our customers' continued success and our growth.

Protect Locally to Influence Globally

High performing, efficient design in conjunction with quality, robust fabrication form our basis to influence environmental outcomes to reduce energy consumption, waste and harm to process equipment locally and waterways more broadly.

Specialities

Primary

Screenings Removal and Processing
Grit Removal and Processing
Screenings and Grit Storage

Secondary

Diffused Aeration
Mechanical Aeration

Supplementary

Pumping Systems
Control Systems
Customised Fabrications

Services

Concept to Detailed Design
Turnkey or Supply & Delivery
Plant Optimisation & Training
After Sales Support
